|WHAT WE WILL DO|

The research lab **wonder** is a training for circus teachers/youth workers from Belgium, Spain, Italy and France. In the training we will connect the methods of **experiential learning, group dynamics and active reviewing** with circus pedagogics.

We will wonder together about these research questions:

1. How can we focus more on physical, non-verbal expression and communication within experiential learning?
2. How can we implement more wonderment and less frustration as a driver of experiential learning?
3. Which influence does physical contact have on models of group dynamics?
